TACTILE MEMORIES

THE LAND OF CYPRESS TREES

Tactile Memories explores touch, movement, and synesthesia, as well as the transformative power of our surroundings. It delves into visibility, motion, action, and chromatic perception to examine how visual stimuli suspend our awareness of time and space and evoke memories and sensations of touch.

Memories of touch profoundly influence our interactions with the world, shaping our engagement with people, spaces, and objects. Touch is associated with movement, temperature changes, and multi-sensory experiences that help us gather haptic information stored in our memory.

Luhring Augustine is proud to present *Muzzle of Time*, Mohammed Sami's first solo exhibition with the gallery and his first in the United States. On view in our Chelsea location from September 8 through October 28, the show will feature new and recent paintings by the Iraqi-born, London-based artist. Several of the works in the exhibition were included earlier this year in *Mohammed Sami: The Point Zero*, the widely lauded first institutional solo show of Sami's work in the United Kingdom, organized by the Camden Art Centre in London and accompanied by the first monograph dedicated to the artist's work.
